

Vacuum Transport System (VTS)

Create optimal efficiency in loading, transporting and sorting mail

Create an all-in-one system to optimize efficiency when loading, transporting and sorting mail pieces. The VTS consists of your existing print configuration and combining three great Sure-Feed products: FeedMAX Autoloader, 43" or 96" Vacuum Base and Speed-Sort Conveyor.

FeedMAX Feeder

The FeedMAX Feeder is a high capacity feeder that can be loaded with 2,500 envelopes, which is five to six times more than standard shuttle feeders saving you time that an operator is needed to load material.

43" or 96" Vacuum Base

The Vacuum Base contains the Programmable Logic Controller (PLC) and AC Drives helping synchronize feeder functions and controlling speed and gaps between mail pieces.

Speed-Sort Conveyor

The Speed-Sort Conveyor is designed to give machine operators a visible separation of where a mail bundle starts and ends.

VTS Advantages

- > Keep your printer, replace the transport system
- > Increase productivity and reduce operator intervention
- > Operates seamlessly
- > Provides quick return on investment (ROI)
- > Offset sorting and batch capability available (with purchase of speed sort conveyor)

FeedMAX, 43" Vacuum Base and Speed Sort Conveyor

Vacuum Transport System (VTS)

Customize Your System

Step 1: Choose a Feeder

- Packaging Feeders
- Ink Jet Feeders
- Force Flex
- Multi-Purpose Feeders
- Inserter Feeders
- FeedMAX/FeedMAX-S

FeedMAX

Step 2: Choose a Base

- 43" Vacuum Base
- 96" Vacuum Base

43" Vacuum Base

Step 3: Choose a Stand-Alone Component

- Dryer Base
- Small Product
- Vacuum Base
- Stand Alone Table with Heat Belts

Dryer Base

Step 4: Choose a Conveyor

- Speed Sort
- Small Product Vacuum
- Slow Moving Collection Vacuum
- Inserter Shingling

Speed Sort Conveyor
